## Spindle Extension

For 5" & 7" Back-up Pads

Thread Size	Thread. Extension	Std. Pack	Item Number	List Price Ea.
5/8-11	1	1	18820	\$33.08

## Anderlube™ Prevents Smearing At Higher Operating Speeds

To work effectively, Anderlon wheels have a low operating speed. This is necessary to maximize the effectiveness of the filament and to prevent heat build-up and smearing. However, equipment often has a fixed operating speed above what is recommended for use with Anderlon abrasive nylon brushes.

66424

Anderlube is a lubricant that should be used with Anderlon abrasive filament wheels operating above the recommended operating speed. A light spray of Anderlube into the face of the brush permits the wheel to be operated at higher speeds and twice the normal load without smearing.

**Standard Pack: 1**  
**List Price: \$22.78**

### Arbor & Drive Hole Specs for Tufted Disc Brushes

Brush Diameter	Arbor Hole Diameter	Drive Holes
3, 4 & 5	7/8	(2) 1/4 dia. on a 1-1/4 dia. bolt circle
6	7/8	(3) 1/4 dia. on a 3 dia. bolt circle
8	7/8	(4) 1/4 dia. on a 3 dia. bolt circle
10	7/8	(4) 1/4 dia. on a 1.625 dia. bolt circle
